Market Commentary

The Philippine Stock Exchange Index (PSEi) cooled in October following three consecutive months of strong performances. At the beginning of the month, the local bourse continued its ascent to north of 7,500 mark backed by the release of lower-than-expected local inflation print in September at 1.9%. Consequently, the Bangko Sentral ng Pilipinas (BSP) reduced policy rates by 25 basis points to 6.0% for the second time in 2024. However, the PSEi failed to overcome the 7,500 to 7,600 resistance level as profit-taking took place. This coincided with weakness on the Philippine Peso which closed to 58.10 or -3.69% month-on-month. Moreover, risk-off stance was adopted by market players as they awaited the result of the US election. The PSEi gave up 1.78% month-on-month to 7,142.96.

The Average Daily Turnover slowed to Php5 billion or -24% month-on-month in October. Meanwhile, foreigners continued to be net buyers at US\$22 million, which marked the 4th consecutive month of net foreign buying. Top foreign bought stocks were AC (+US\$24.5 million), BPI (+US\$15 million) and GLO (+US\$10.0 million). In terms of participation level, it was an even split between foreigners and locals at 50%.

On a per stock basis, the top three index gainers for the month include: MER (+11.82%), CNPF (+10.38%) and MONDE (+7.07%). Meanwhile, the bottom three performers include: JGS (-12.59%), WLCON (-12.02%) and ALL (-10.66%). Market breadth was skewed to the negative territory with 23 declines versus 7 advances.

Cumulative Performance (%)

YTD	6 Months	1YR	2YR	Since Inception
11.92	7.12	21.01	19.72	80.58

Cash & Cash Equivalents	0.45

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
