

FUND FACT SHEET

All data as of May 31, 2023 unless otherwise stated

Fund Objective and Strategy

The Fund aims to achieve long-term capital appreciation by investing in a diversified portfolio of equities and fixed income instruments. The Fund shall invest at least 90% of its net assets in equity securities under normal market conditions. The Fund aims to outperform its composite benchmark, 90% BPI Philippine Equity Total Return Index plus 10% return of the 91-day Philippine Treasury Bill (net of tax).

Highest (30 January 2018)	1.1664
Lowest (23 March 2020)	0.6085
NAVPU – 31 May 2023	0.8295

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. As a marked-to-market Mutual Fund, the Fund's net asset value, and total return may fluctuate as a result of movements in stock prices and interest rates. On redemption of shares, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

BPI-Philam Growth Fund 2

Market Commentary

The Philippine Stock Exchange Index (PSEi) retreated in May and this could be attributed to the following concerns: 1) Worries over potentially more rate hikes from US Federal Reserve 2) US Debt Ceiling deadlock, and 3) Uncertainties on Bangko Sentral ng Pilipinas' (BSP) monetary policy stance. The weakness of the Philippine Peso against the greenback (US Dollar) after falling to a six-month low at Php56.31 and the MSCI rebalancing – where the Philippines had a general down-weight causing significant net foreign outflow, further added downward pressure to share prices. The local bourse index dropped 2.2% to below 6,500-mark at 6,477.

Activity for the month of May improved with Average Daily Turnover registering at Php 5.04 billion or 18.2% higher than prior period's Php4.27 billion. This was mainly driven by the MSCI rebalancing event at close of business (COB) on the last trading day of May. In terms of flows, foreigners reverted to net-selling in May at US\$81 million driven mainly by the MSCI rebalancing. Foreign participation was higher at 53% in the same period.

On stock performance in May, the top gainers are as follows: GTCAP (+7.95%), JFC (+4.71%) and SM (+3.80%). Meanwhile, here are the biggest laggards for the month: MONDE (-13.37%), ICT (-10.14%) and ICT (-7.80%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
