Market Commentary

PSEi was down -3.49% month on month and closed at 6,556. YTD net foreign outflow stood at \$19.9M as renewed foreign selling accelerated during the 2nd half of the month, reversing our initial net foreign inflow as of January end. The peso closed at 55.33 against the USD.

Notable events that happened during the month of February were the surprise inflation print that exceeded most estimates as well as the MSCI Index rebalancing event that took out GLO and ACEN.

Top gainers for the month were SMC +15.12% and MER +13.26%, while the top losers were GLO -12.13%, AC -11.60% and ACEN -9.43%.

We expect global macroeconomic concerns to dictate the market's direction both globally and locally for earlier part of the year. We expect volatility to persist as numerous headwinds still remain.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
