

# FUND FACT SHEET

All data as of April 30, 2024 unless otherwise stated

## Fund Objective and Strategy

The Fund aims to achieve long-term capital appreciation by investing in a diversified portfolio of equities and fixed income instruments. The Fund shall invest at least 90% of its net assets in equity securities under normal market conditions. The Fund aims to outperform its composite benchmark, 90% BPI Philippine Equity Total Return Index plus 10% return of the 91-day Philippine Treasury Bill (net of tax).

Highest (30 January 2018)	1.6863
Lowest (17 March 2020)	0.8894
NAVPU – 30 April 2024	1.2118

## Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. As a marked-to-market Mutual Fund, the Fund's net asset value, and total return may fluctuate as a result of movements in stock prices and interest rates. On redemption of shares, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

## TOP HOLDINGS Asset Allocation

**Risk Warning:** Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA\* internal data. ## Market Commentary

The Philippine Stock Exchange Index (PSEi) exhibited a wide swing in April. The index started off strong, reaching as high as 7,000 level to falling to as low as 6,400 mark before ultimately settling at 6,700.49 or down by 2.94% on a month-on-month basis.

Risk-off sentiment ensued on the back of the US Federal Reserve's (The Fed) hawkish tone coupled by escalating tensions over in the middle east. On the local space, the headline inflation in March rose to 3.7% from 3.4% in February primarily due to food inflation which registered at 5.6%. Moreover, investors were also wary of the Philippine Peso's depreciation, recording at 57.8 against the US Dollar at one point during the month.

Trading activity slowed during the month, with average daily turnover at US\$116 million or 6.5% lower than US\$124 million recorded in March. Foreign selling persisted for another month at US\$412 million, the highest since September 2023. Property stocks saw the largest outflow while consumer names had some sizable sell-offs. On the other hand, banks continued to see foreign demand while conglomerates exhibited two-way flows. Foreign participation declined to 46% from 50%.

On a per name basis, the top three index gainers for the month include: BPI (+7.96%), ACEN (+7.79%) and MBT (+7.44%). Meanwhile, the bottom three performers were: SMPH (-14.53%), PGOLD (-11.57%) and ALI (-10.85%).
