

## FUND FACT SHEET

All data as of November 30, 2023 unless otherwise stated

### Fund Objective and Strategy

The Fund, operating as a Feeder Fund, aims to achieve long-term capital appreciation by investing in a Target Fund with a diversified portfolio of attractively-priced stocks with high dividend yields in the Asia Pacific region. It aims to outperform its benchmark which is the MSCI AC Asia Pacific ex-Japan High Dividend Net Return USD Index.

### Fund Details

**Risk Warning:** Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA\* internal data. ## BPI-Philam Odyssey Asia Pacific High Dividend Equity Fund

### Market Commentary

Asian equities ended the month up in November after retracting over the last three months. Markets have moved away from the "higher for longer scenario" and have started pricing in a rate cut environment for the future. Hence, lower rate beneficiaries like growth stocks have performed better. Korea, Taiwan and India appreciated the most, while the bottom three markets were Hong Kong, which appreciated the least, along with Thailand and Singapore, which retracted marginally. Korea was up on optimism in the memory module outlook along with the battery material names that have performed well. India gained during the month as the long term growth story remains intact, attracting inflows into the market. Thailand's GDP growth came in below expectations and its trade balance reverted to a deficit during the month. Investors remained cautious in Singapore due to a higher than expected core inflation

### Cumulative Performance (%)
