

# FUND FACT SHEET

All data as of August 30, 2024 unless otherwise stated

## Fund Objective and Strategy

The Fund is for US Dollar investors who want to achieve capital appreciation and income growth over a period of time. To achieve this, the Fund will be invested in a diversified portfolio of US dollar-denominated fixed income instruments issued by the Philippine government, corporations, & financial institutions. The Fund aims to outperform its benchmark, the JP Morgan Chase Asia Total Return Philippines Index.

Inception Date	March 12, 2015
Fund Classification	Long Term Bond Fund
Fund Size	USD 1.51 Million
Fund Currency	United States Dollar
No. of Holdings	13
Fund Management Fee	1.25% per annum

## Highest and Lowest Unit Price Achieved

Initial (12 March 2015)	1.0000
Highest (15 September 2021)	1.2668
Lowest (17 June 2015)	0.9907
NAVPU – 30 August 2024	1.2573

## Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

## BPI-Philam Odyssey Philippine Dollar Bond Fund Market Commentary

The JP Morgan Asia Credit Index (JACI) Philippines returned 2.51% in August as Philippine dollar-denominated yields declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 13 bps from 4.03% to 3.90% in the same period.

Global bond yields fell further as economic data releases reinforced the view that the time has come for the US Federal Reserve to adjust its policy rates. US inflation slowed down further from 3.0% in June to 3.0% in July, lower than market expectations. Meanwhile, the Core PCE Index or the Personal Consumption Expenditure Core Price Index, which is the Federal Reserve's preferred gauge for inflation, rose at a mild pace from 2.5% in June to 2.6% in June. While spending rate increased moderately, income growth was more sluggish, and savings rate declined. Moreover, the much-awaited speech of Fed Chair Powell at the Jackson Hole symposium came out with a dovish tone supporting the policymaker's plan to ease the key rate.

On the domestic front, July inflation came in at 4.4% year-on-year, higher than the previous print of 3.7% and higher than market expectations. The local inflation quickened in July following increase in housing, electricity, gas, and other fuel prices. Despite the uptick in prices, the Bangko Sentral ng Pilipinas finally reduced its policy rates by 25 basis points to 6.25%, becoming one of the first Asian central banks to ease rates besides China.

## Cumulative Performance (%)

**Risk Warning:** Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA\* internal data.
