

FUND FACT SHEET

All data as of November 29, 2024 unless otherwise stated

Fund Objective and Strategy

The Fund aims to achieve a steady stream of income by investing in a diversified portfolio of Philippine Peso denominated high-grade fixed income instruments, such as, but not limited to, government securities, corporate notes and bonds, and fixed income funds. The Fund aims to outperform its composite benchmark, 75% of the 91-day Philippine Treasury Bill– net of tax and 25% of the BPI 1-5 Year Index.

Initial (25 October 2011)	1.0000
Highest (29 November 2024)	1.4640
Lowest (25 October 2011)	1.0000
NAVPU – 29 November 2024	1.4640

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's yield, net asset value, and total return may fluctuate as a result of interest rate movements and the changes in credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

BPI-Philam Peso Bond Fund Market Commentary

The BPI Government Bond Index returned -0.23% in November as Philippine government bond yields rose by an average of 24 basis points (bps). Average daily trading volume for the month reached Php36.1 billion, lower than Php39.5 billion in October, with most trades concentrated in 5-year followed by 1-year papers. Despite the lower average trading volume, foreign investors' fixed income volume was net buying for the month compared to previous month's net selling.

The Bureau of the Treasury (BTr) held two FXTN auctions in November, offering the 5- and 20-year tenors. FXTNs 20-27 (20year) and 7-67 (5-year) were fully awarded at average yields of 6.095% and 5.954%, respectively.

Locally, October headline inflation rose to 2.3% year-on-year (YoY) from 1.9% YoY in September, well within Bangko Sentral ng Pilipinas' (BSP) forecast range of 2.0% to 2.8% for the month. The pick-up in inflation was driven mainly by faster food inflation due to adverse weather conditions for the month and tapering of favorable base effects from last year. Rice inflation in October also accelerated by 9.6% YoY from September's 5.7% YoY, breaking its 6-month deceleration streak. The reversal of the course due to year-on year base effects as rice inflation slowed in 2023 after the government implemented a rice price ceiling shortly last year.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
