

# FUND FACT SHEET

All data as of January 31, 2024 unless otherwise stated

## Fund Objective and Strategy

The Fund aims to achieve a steady stream of income by investing in a diversified portfolio of Philippine Peso denominated high-grade fixed income instruments, such as, but not limited to, government securities, corporate notes and bonds, and fixed income funds. The Fund aims to outperform its composite benchmark, 75% of the 91-day Philippine Treasury Bill– net of tax and 25% of the BPI 1-5 Year Index.

## Fund Details

Fund Manager	BPI WEALTH – A Trust Corporation
Inception Date	October 25, 2011
Fund Classification	Bond Fund
Fund Size	PHP 9,935.60 Million
Fund Currency	Philippine Peso

## Highest and Lowest Unit Price Achieved

Initial (25 October 2011)	1.0000
Highest (31 January 2024)	1.4242
Lowest (25 October 2011)	1.0000
NAVPU – 31 January 2024	1.4242

## Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's yield, net asset value, and total return may fluctuate as a result of interest rate movements and the changes in credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

## BPI-Philam Peso Bond Fund

### Market Commentary

The BPI Government Bond Index returned -0.18% in January as the local yield curve bear steepened, rising 13 basis points (bps) on average. Average daily trading volume for the month amounted to PHP20.98 billion higher than December's PHP15.48 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in January, all of which are new issuances. The 3-year FXTN 03-30, 5-year FXTN 05-78, 7-year FXTN 07-71, and 10-year FXTN 10-72 were priced at coupon rates of 6.000%, 6.125%, 6.125%, and 6.250%, respectively. In addition, with the tender bids reaching more than PHP100 million, the BTr offer tap issuances for the 7-year and 10-year papers, awarding PHP5 billion each.

In the local space, December headline inflation fell sharply to 3.9% year-on-year from previous month's 4.1%. Despite the December figure being the slowest print since February 2022, average inflation for 2023 concluded at 6%, which is still above the BSP's target range of 2% to 4%. The slowdown was mainly driven by easing inflation from most commodity groups such as housing, water, electricity, gas, and other fuels. Although price pressures are starting to ease, the BSP noted the unlikelihood of cutting policy rates for the first half of the year due to risks of supply shocks, consistent with the tones of the FED and other central banks.

④ Ayala Corporation Bond 2025	3.66%
⑤ Aboitiz Equity Ventures Bond 2027	3.29%

**Risk Warning:** Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA\* internal data.
