Fund Management Fee	0.50 % per annum

Highest and Lowest Unit Price Achieved

Initial (22 February 2011)	1.0000
Highest (31 July 2024)	1.5912
Lowest (28 February 2011)	0.9978
NAVPU – 31 July 2024	1.5912

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. The Fund's yield, net asset value and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

BPI – Philam US Dollar Bond Fund Market Commentary

The JP Morgan Asia Credit Index (JACI) Philippines rose 1.15% in July as Philippine dollar-denominated yields declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 37 bps from 4.40% to 4.03% in the same period.

Global bond yields fell as economic data releases further reinforced the view that the US Federal Reserve could accelerate its monetary policy rate cuts. US inflation slowed down further from 3.3% in May to 3.0% in June, lower than market expectations. Meanwhile, the PCE or the Personal Consumption Expenditure Core Price Index or PCE, which is the Federal Reserve's preferred gauge for inflation, also dropped from 2.6% in May to 2.5% in June.

On the domestic front, June inflation came in at 3.7% year-on-year, lower than the 3.9% recorded last May and slower than market expectations. The slowdown was evident in a number of segments, particularly in housing in transport. Moving forward, rice tariff reductions could tame inflation further. The Bangko Sentral ng Pilipinas has reiterated that it remains vigilant of forthcoming data releases and will act accordingly in terms of adjusting its monetary policy.

⑩ Republic of the Philippines Bonds 2047	3.49%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
