

FUND FACT SHEET

All data as of September 30, 2024 unless otherwise stated

Fund Objective and Strategy

The Fund aims to achieve a balance of income and capital growth through a diversified portfolio of US dollar-denominated fixed-income instruments.

Fund Details

Fund Manager	BPI WEALTH – A Trust Corporation
Inception Date	February 22, 2011
Fund Classification	Bond Fund
Fund Size	USD 48.25 Million
Fund Currency	US Dollars
No. of Holdings	38
Fund Management Fee	0.50 % per annum

Highest and Lowest Unit Price Achieved

Initial (22 February 2011)	1.0000
Highest (30 September 2024)	1.6430
Lowest (28 February 2011)	0.9978
NAVPU – 30 September 2024	1.6430

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. The Fund's yield, net asset value and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

BPI – Philam US Dollar Bond Fund Market Commentary

The JP Morgan Asia Credit Index (JACI) Philippines returned 1.61% in September as Philippine dollar-denominated yields declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 12 bps from 3.90% to 3.78% in the same period.

Global bond yields fell further as the US Federal Reserve finally started its easing cycle by reducing the policy rates by 50 basis points. Moreover, the Fed released its projection materials which showed Fed officials expecting more rate cuts until 2026. US inflation slowed from 2.9% in July to 2.5% in August, in line with expectations. Meanwhile, the Core PCE Index or the Personal Consumption Expenditure Core Price Index, which is the Fed's preferred gauge for inflation, rose at a mild pace from 2.6% in June to 2.7% in July, also in line with expectations.

On the domestic front, August inflation came in at 3.3%, lower than the previous print of 4.4% and the 3.6% median forecast. The sharp decline was brought by slower year-on-year increase in rice prices, decline in oil prices, and cheaper imports through stronger Philippine peso against the US dollar. In a surprise move, the Bangko Sentral ng Pilipinas slashed banks' reserve requirement ratio from 9% to 7.5%. This policy change will free up more cash in banks, making it available for investing or lending.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall Risk Warning: Past performance is not indicative of tuture results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved.
